

INF-55DUO

55 inch Outdoor Floor Standing for Digital Signage

DESCRIPTION

Outdoor and waterproof floor standing LCD display DOUBLE SCREEN 55 inch digital signage range of premium high brightness monitors are for use in the most demanding, and brightest environments.

These screens are designed for use in direct sunlight. With sunlight comes heat. A normal LCD screen when exposed to high temperatures will fail causing dark patches to appear on screen which degrades the screen overtime. The LCD panels used in high brightness screens are designed to withstand extreme temperatures up to 50°C without blackening.

FEATURES

- High brightness sun readable screen(2500nits).
- Waterproof standard IP65.
- 9mm PVB laminated glass, ultra clear and high security
- Unique cooling system can let display working under direct sunlight.
- Commercial designed for 24/7 operation.
- Can be inbuilt PC or Android player, touch screen is optional.
- Built in heater, the LCD display can be worked -20°C.
